

# AGRI-INTEL USER GUIDE

V8.0

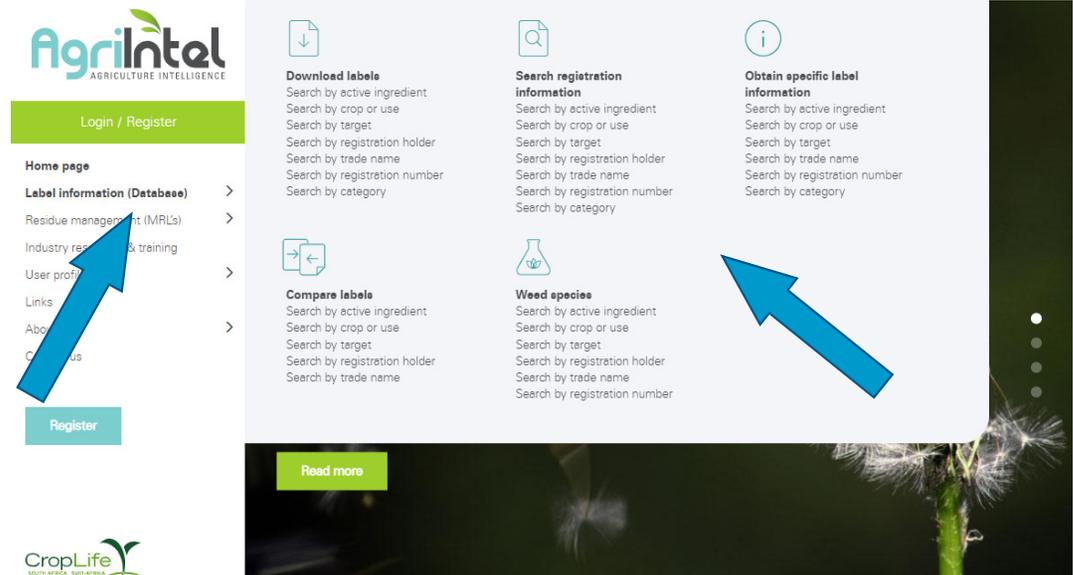

## 1. Label information (Database)

The Label information (Database) section provides access to the content of the agrochemical database. Use the available selection tools to search for and attain the specific information required. For this purpose, several selection pages are available. The results will be displayed in reports that can be viewed on screen or saved in PDF format.

There are different types of information that can be obtained: facilities to quickly download product labels; mechanisms to determine the crops and targets on which active ingredients are registered; to obtain information on the application of products regarding dosages, directions and restrictions, and to compare labels in terms of certain information.

These tools are available on different selection pages and they will yield results referred to as reports.

Each of the section headings are explained in further detail on the following slides.

Under each heading there are various starting points by which your search can be started with. If you know the active ingredient, for example, you can then start with “Search by active ingredient” and filter accordingly. Each section will yield a different report type, but you can start at any of these points and still obtain the same answer. Labels and SDS are available to download on any report drawn.

### Download labels

#### Download labels

To download product labels and SDS in English (and Afrikaans where available) in PDF format. This report is very summarised.

Use this option when you need to quickly obtain the label/SDS and you already know what active, crop or use, target, registration holder, trade name, registration number or category is required.

### Search registration information

#### Search registration information

Use this option when you have a certain active ingredient, crop, target, registration holder, category, trade name or registration number in mind and you need more information about the registrations related to it.

### Obtain specific label information

#### Obtain specific label information

Use this option when you know the active, crop or use, target, trade name, registration number or category, and require detailed information regarding **one** product e.g., the formulation; the registered crops, targets and dosages; application information and use restrictions.

## Compare labels

### Compare labels

Use this option when you need to compare registrations between different actives, crop or uses, targets, registration holders or trade names in terms of information such as formulation types; active quantities; dosages on certain crops and targets; basic instructions and restrictions. Reports are the same as the Obtain specific label information section however you are comparing more than 1 label.

## Weed species

### Weed Species

This section allows one to search for active ingredients, crops, registration holders, tradenames and registration numbers to see which weed species can be controlled.

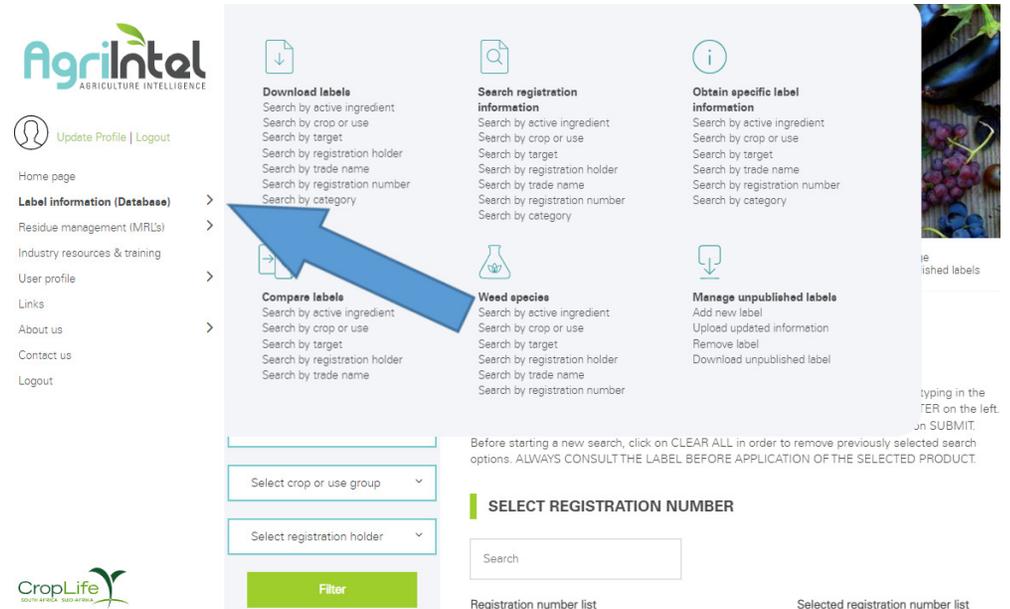

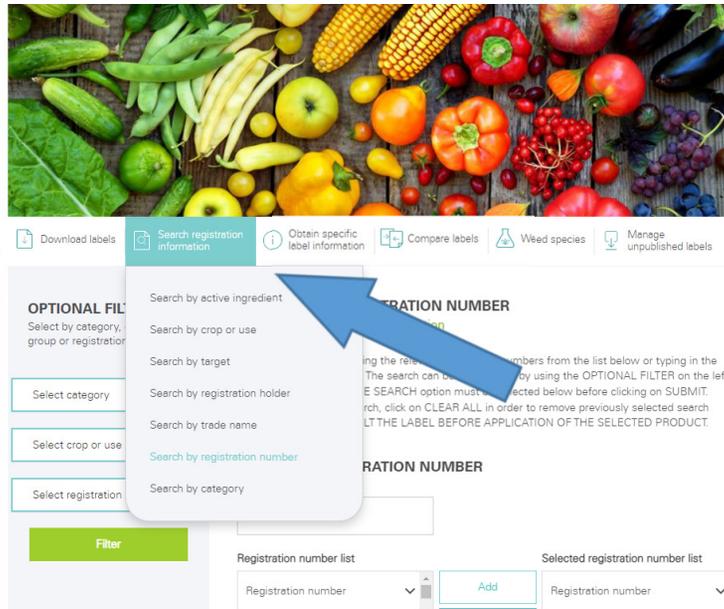

## Manage unpublished labels

### Manage unpublished labels

This section is only visible to registration holders. It is another platform by which new labels or amendments to current labels can be submitted.

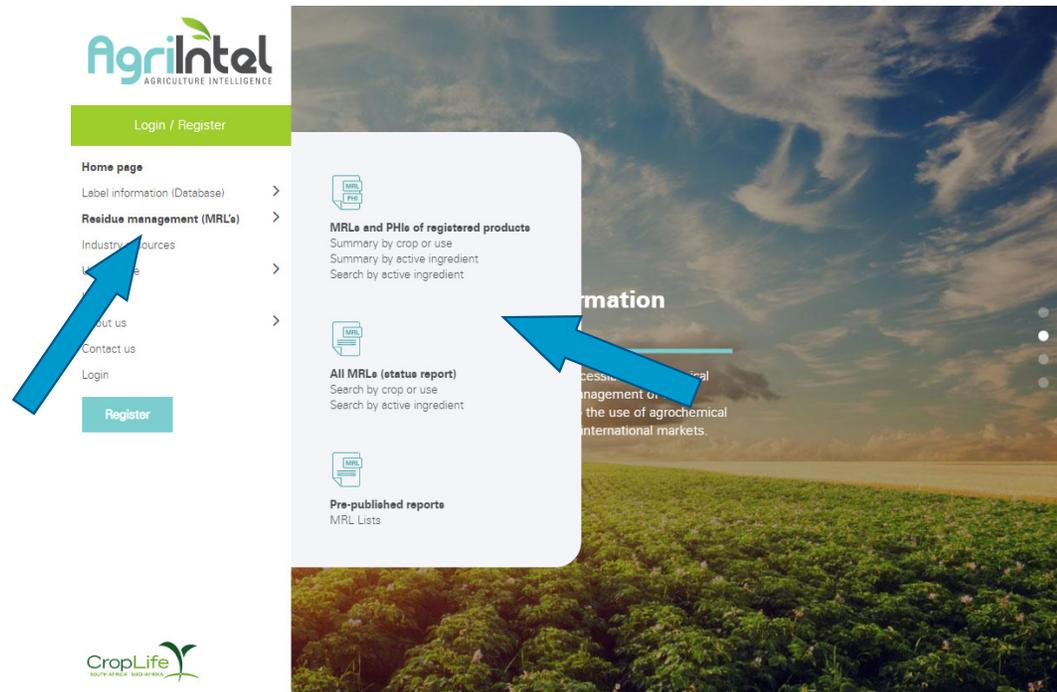

One can also access these search options via the dropdown menus indicated below, as well as on the left-hand side of the screen:

## 2. Residue Management (MRLs)

Agri-Intel provides the functionality to draw up your own MRL list for a selected crop or active ingredient; to download a pre-published MRL list for certain crops or to search for MRL and PHI information as required.

MRL and PHI (pre-harvest interval) information can be obtained by selecting 'Residue management (MRLs)' as shown below:

The screenshot displays the AgriIntel website interface. On the left, a navigation menu is visible with the following items: Home page, Label information (Database), Residue management (MRLs), Industry resources, News, About us, Contact us, and Login. A blue arrow points to the 'Residue management (MRLs)' menu item. A dropdown menu is open, showing the following options: 'MRLs and PHI of registered products' (with sub-options: Summary by crop or use, Summary by active ingredient, Search by active ingredient), 'All MRLs (status report)' (with sub-options: Search by crop or use, Search by active ingredient), and 'Pre-published reports' (with sub-option: MRL Lists). A second blue arrow points to the 'MRLs and PHI of registered products' option. The background of the website shows a green field under a blue sky with clouds. The CropLife logo is visible in the bottom right corner of the screenshot.

## Finding MRL and PHI data:

To find specific MRL and PHI data as required, the features on the screen can be used:

### **MRLs and PHIs of registered products**

Summary by crop or use  
Summary by active ingredient  
Search by active ingredient

### **MRLs and PHIs of registered products**

Obtain MRLs, PHIs and market preferences for actives which are registered on specific crops or uses within South Africa. Customised MRL lists for specific crops can also be generated and downloaded here.

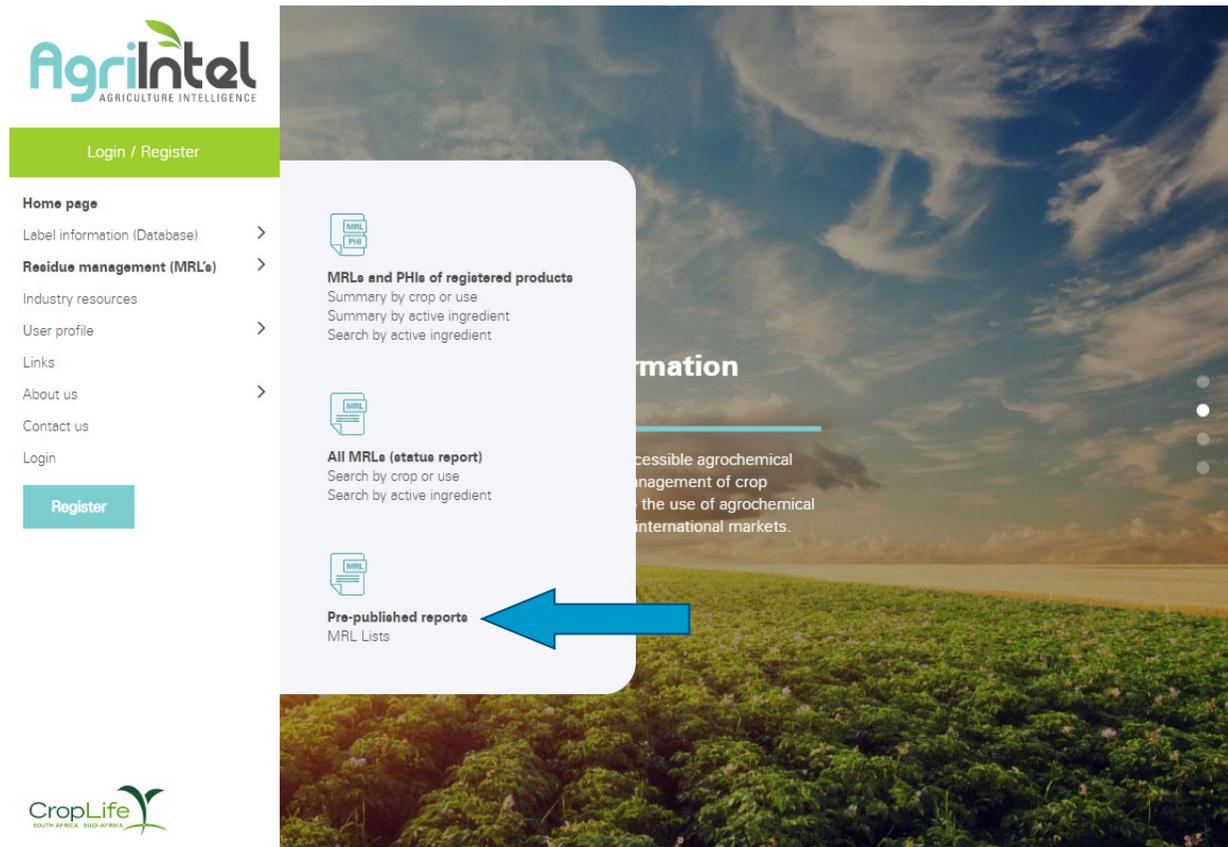

### **All MRLs (status report)**

Search by crop or use  
Search by active ingredients

### **All MRLs (status report)**

Obtain MRLs and market preferences for all actives and crops, regardless of whether the active is registered on the crop in South Africa. No PHIs are included in these reports.  
Use this option when you want to find an MRL for any crop and active combination or a comprehensive list of MRLs.

## Downloading a Pre-published MRL list:

The screenshot shows the AgrIntel website interface. On the left is a navigation menu with the following items:

- Login / Register
- Home page
- Label information (Database) >
- Residue management (MRLs) >
- Industry resources
- User profile >
- Links
- About us >
- Contact us
- Login
- Register

The main content area features a large background image of a green field under a cloudy sky. A white overlay box contains the following sections:

- MRLs and PHIs of registered products**  
Summary by crop or use  
Summary by active ingredient  
Search by active ingredient
- All MRLs (status report)**  
Search by crop or use  
Search by active ingredient
- Pre-published reports**  
MRL Lists

A blue arrow points to the 'Pre-published reports' section.

**CropLife**  
SOUTH AFRICA SUID-AFRIKA

After selecting the 'Residue Management (MRLs)' icon as shown above, you will arrive at the page indicated below. From the drop down list you can select the Pre-published report that you require and then click on 'Submit'. This will then take you to a page where you can download the MRL list. Pre-published reports for grapes, citrus, stone and pome fruits are indicated here.

## 3. Industry resources & training

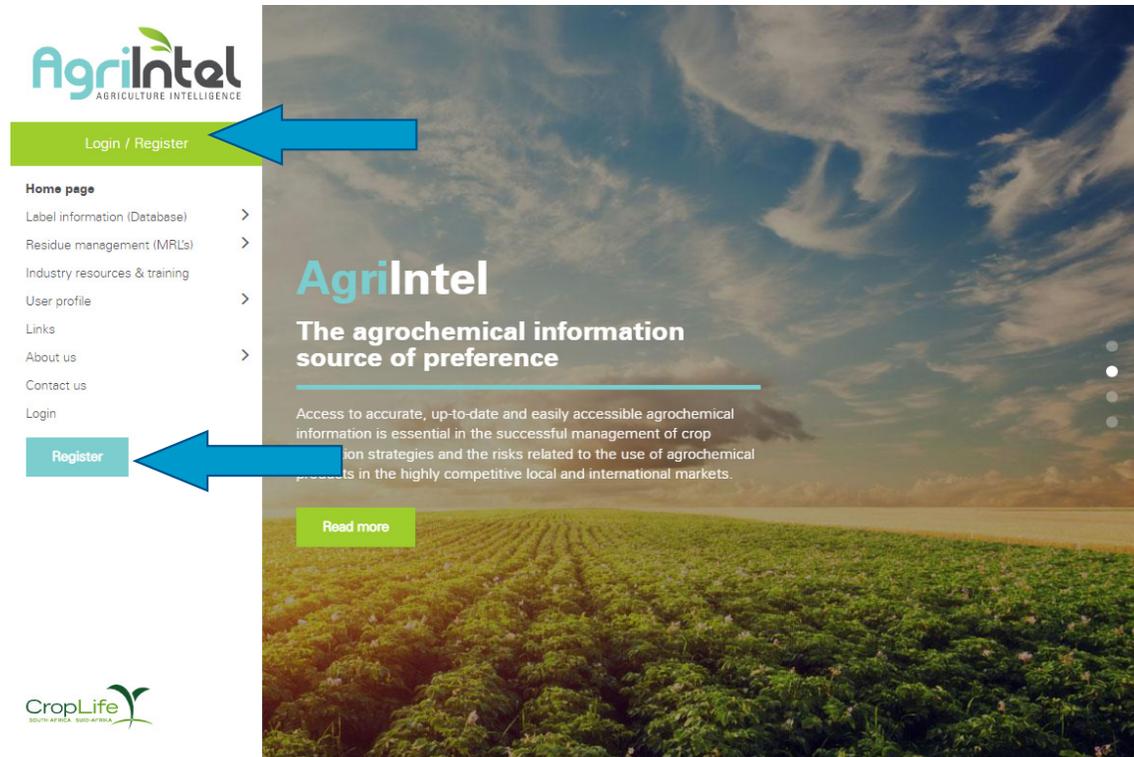

A platform where industry documents are uploaded for your information as well as online training videos on how to use Agri-Intel

The screenshot shows the AgriIntel website interface. On the left is a navigation menu with the following items: Home page, Label information (Database), Residue management (MRLs), Industry resources & training, User profile, Links, About us, Contact us, and Login. A blue arrow points to the 'Industry resources & training' menu item. Below the menu is a 'Register' button. The main content area features the AgriIntel logo and the headline 'The agrochemical information source of preference'. Below this is a paragraph of text: 'Access to accurate, up-to-date and easily accessible agrochemical information is essential in the successful management of crop protection strategies and the risks related to the use of agrochemical products in the highly competitive local and international markets.' A 'Read more' button is located at the bottom of this text block. The background of the main content area is a photograph of a green agricultural field under a blue sky with clouds. The CropLife logo is visible in the bottom left corner of the screenshot.

Access the website on [www.agri-intel.com](http://www.agri-intel.com)

On the home page, click on the 'Login/Register' or 'Register' icon as indicated below:

On the next page, select the membership type:

The screenshot displays the registration interface. On the left is a navigation menu with items: Label information (Database), Residue management (MRL's), Industry resources & training, **User profile**, Links, About us, Contact us, and Login. A 'Register' button is located below the menu. The main content area features a progress bar with 7 steps: 1. Membership, 2. Select package, 3. Account info, 4. Company info, 5. Personal info, 6. Confirmation, and 7. End. Step 1 is currently active. The registration title is 'REGISTER' with the subtext 'Gain access to our services'. Below this, there are instructions and a list of terms: 'Only 1 user per application', 'No sharing of accounts details', and 'For bulk user registrations (> 3 users from the same company) a discount will be available. Please contact us to register.' The user is prompted to select a membership type from three options: 'CropLife South Africa Membership', 'Non-CropLife Membership', and 'International Membership'. Each option includes a 'Select' button. Two large blue arrows point towards the 'Select' buttons for the first and third membership types.

Gain access to our services

Before subscribing please take note of the following:

- Only 1 user per application
- No sharing of accounts details
- **For bulk user registrations (> 3 users from the same company) a discount will be available. Please contact us to register.**

Please select the membership type below that you would like to apply for:

CropLife South Africa Membership	Non-CropLife Membership	International Membership
User must be employed by a CropLife South Africa member company.	User must reside in South Africa, Namibia, Lesotho or Eswatini and not be employed by a CropLife South Africa member company.	For users not residing in South Africa, South Africa, Namibia, Lesotho or Eswatini
Requires CropLife South Africa membership number for registration.	If you would like to become a member of CropLife South Africa, please click <a href="#">here</a> .	
Select	Select	Select

Then click on 'Accept' after reading the terms and conditions

The screenshot displays the registration interface. On the left is a navigation menu with the following items: Label information (Database), Residue management (MRLs), Industry resources, **User profile**, Links, About us, Contact us, and Login. A teal 'Register' button is positioned below the menu. The main content area features a progress indicator on the left with seven steps: 1. Membership (highlighted), 2. Select package, 3. Account info, 4. Company info, 5. Personal info, 6. Confirmation, and 7. End. The 'REGISTER' section is titled 'REGISTER' with the subtitle 'Gain access to our services'. It contains the text: 'To register with Agri-Intel and gain access to its services, **users have to accept its terms and conditions** and enter into an agreement with Agri-Intel, either as individuals or as member of a specific group, e.g., a grower group or CropLife SA.' Below this, it says 'To continue with registration, click on **Accept** below.' and 'For more information, contact [Agri-Intel](#).' At the bottom of the registration area are two buttons: a teal 'Back' button and a green 'Accept' button. A large blue arrow points from the text 'click on Accept below' to the 'Accept' button.

**REGISTRATION WAS SUCCESSFUL**  
Thank you for registering with Agri-Intel.

Please allow up to two working days for the verification of your registration details. Agri-Intel will inform you by email whether access to Agri-Intel has been approved or not.

Once your access has been approved, if there is an amount payable, we will send you an invoice email with payment details. Please pay the invoice to access Agri-Intel.

Should you urgently require access to the website, please contact [Agri-Intel](#).

Your registration has now been sent through to the Agri-Intel admin for review. An email will be sent to you to confirm that your registration has been received. Your application will be reviewed and vetted within two working days. Once the application has been vetted, you will receive another email which will confirm your registration and include your invoice and payment details, should payment be required. Once payment has been received, you will then be able to log in with the details you have provided to gain access to the website for 1 year.

- Access to Agri-Intel is based on an annual subscription.
- Fourteen days before the user's subscription is about to expire, an email will be sent to the user to remind them to renew their subscription.
- If the user has not renewed by the end of that month, the system will send another reminder via email the day before the subscription expires.
- The user is welcome to renew at any stage after this but access to the website will expire at the end of that month.
- Invoices, where applicable, can only be issued once the user has renewed their subscription.
- Steps on the renewal process are on subsequent pages

- Login to the Agri-Intel website
- Access your “User profile”
- Click on “Update user profile”
